

Real-Time Data & VIX Underlying Data Terms & Conditions

SogoTrade Inc. is authorized to charge the cost of real-time composite market data and/or VIX Underlying Data from the cash balance in your account.

SogoTrade Inc. will continue to charge your account, on the first business day of the month, for access to real-time composite market data during the previous month unless you have executed 5+ stock trades during the previous month OR have averaged 5+ stock trades / month over the past 3 months (for real-time composite stock quotes) or have executed 1+ option trade during the previous month OR have averaged 1+ option trade / month over the past 3 months (for real-time composite option quotes) or have generated a total of \$30.00 or more in total commissions (from both stock and option trades) during the previous month (for either real-time composite stock or option quotes).

SogoTrade Inc. will continue to charge your account, on the first business day of the month, for access to VIX Underlying market data during the previous month unless you **execute 1+ VIX Option trade during the month or average 1+ VIX Option trade /month over the past 3.** Otherwise, the following real time data pricing will apply:

Real Time VIX Index Quote: \$2.25 per month

The cost of real-time composite data and/or VIX Underlying Data, once charged, is non-refundable, even if the account is closed or transferred. Access to real-time composite data and/or VIX Underlying Data is only applicable to the specific account that has selected to receive it and has either paid for it or has met the previous month trade / commission requirement to receive it for free. If an account has selected real-time composite data and/or VIX Underlying Data has been charged on the 1st day of the following month, but does not have sufficient equity to cover the charge, then in addition to the data charge being applied, access to real-time composite data and/or VIX Underlying Data will be removed and only delayed composite data and/or NO VIX Underlying quote will be provided moving forward. If an account has not been logged into for three (3) consecutive months, the data provided will revert back to free Delayed quotes and/or no VIX Underlying quote. Reselecting real-time data and/or VIX Underlying Data will be required upon return.

IRA accounts are only permitted to receive delayed composite data. However, as is the case with all accounts with access to delayed quotes, a real-time composite quote will be displayed during order.
